## Summary

While studying at WeThinkCode\_, the first time I was introduced to front-end web development was my final project, and I found quite an interest in it. Thus sparking my passion for it, although the sparks were quite small. I got another opportunity to intern as a front-end web developer at Home Assist Technologies which then turned the sparks into a burning passion.

I have gained knowledge from internships and familiarized myself with some common web development languages, frameworks, and technologies such as HTML | Javascript | CSS | Python | C# | ASP .NET MVC | SQLite | SQL Server Management Studio 19 | Azure Data Studio and Microsoft Visual Studio

My ability to collaborate with others and effectively communicate with team members has been strengthened as a result of my internship at WeThinkCode and Home Assist. At Home Assist I have learned to use the .NET 6 framework, and the ASP .NET MVC (model-view-controller) pattern, and have assisted in the creation of a web application that has been fully deployed.

My responsibilities at Home Assist Technologies were managing, creating using C#, HTML, and Javascript, and testing features of web applications during development which was quite a challenge considering never having used the MVC pattern, SQL Server Management Studio, Azure Data Studio, and Microsoft Visual Studio

## Experience

### Junior Software Engineer

Home Assist Technologies

Apr 2022 - Oct 2022 (7 months)

## Education

### WeThinkCode

N/A, Computer and Information Sciences and Support Services

2020 - 2022

## Licenses & Certifications

### Web Development Fundamentals - IBM

PLAN-8749C02A78EC

## Skills

Dart • GitHub • Cascading Style Sheets (CSS) • Visual Studio • SQL • .NET Core • SQLite • HTML • .NET Framework • Entity Framework

## Honors & Awards

## **Certificate of Achievement - WeThinkCode\_**

Aug 2022

For successfully completing the WeThinkCode\_ Software Engineering Programme
